Before You Sign

A five-stop Tokyo mystery · Take apart a handoff that never happened

Three scene strips, a paper frame and a production sheet marked “1930.” You agreed to help reconstruct a Tokyo view. Instead, you receive an edit accusing a camera assistant of taking the original. The next page already reserves a place for you as witnesses. Aya, the assistant, sends one line: “Please do not sign for me. What I took is not what they say is missing.”

First, join the scattered pieces. Then find out what you have actually witnessed.

The characters, commission, messages, footage and handoffs are fictional, presented through offline text and illustrated storyboards. This is not a live feed; it does not film you or send messages. The places and sourced historical facts are real. The venues are not participants in this case.

Prepare on the next page, then follow the chapters. Hints and outcomes are on separate leaves. Ending materials stay at the back and need not be viewed during preparation.

Before you leave

Suggested team size: 2–4. Print one language, A4 single-sided at 100%, with fit-to-page off. Bring a pen, clipboard, clips and scissors. Cut only the marked puzzle pieces in the front section. Read the five stops in order. Hints, solutions and ending are at the back; cover them with blank paper during preparation. Cut and fold the souvenir only after playing.

1. Follow the five-stop route and pause whenever needed. Dramatic pressure is not a real countdown.
2. Every chapter and the finale are accessible from the start. A correct early solution receives the complete ending.
3. Each stop has three free hints and assistance. Help never reduces the truth or souvenir.
4. The Stop 3 verification/exchange choice only affects the park diagram's initial alignment. Independent/joint signature at the end is a separate choice.
5. Distinguish sourced facts, character claims and original illustrations. Desktop play uses the supplied material without pretending to be a field visit.
6. Handle only the kit and screen. No filming, mailing, payment, posted codes, moving real objects or staff assistance is required.

Use permitted stopping places without blocking traffic. Stay off the road and outside paid museum areas, the sports centre and theatre. The free Basho observation garden has published hours of 09:15–16:30; use the supplied substitute and mark it as such if closed or inaccessible. The official notice places parts of Hamacho Park out of use through fiscal 2030; obey current barriers. Put pieces away at crossings. Read from a safe place in rain, crowds or near water.

Preparation checklist

Prepare only these original mechanism materials: three view cards, three horizontal scene strips and frame; two river-map faces and two labels; two timelines and a lower-bound strip; two park-map faces, four camera markers, two purpose labels and facade reference; four theatre-name strips and the 1928 relocation strip.

Paper play: keep tasks and pieces in front, consult sources freely, fold the hint page to cover later hints, and read the outcome page after answering.

Team / date: _____

You have not signed. You are already the witness.

The story begins · reading page

Mamiya I produced this film. The scene has been split. Help me rebuild it against the real street corner. Describe how you placed it, and the last witness account will be complete. The draft is already with our internal review desk and another shoot is scheduled. Corrections can go to that desk too.

Record An edit is already circulating inside the fictional production team: Aya picks up a frame; a cut shows a hand receiving a packet. Caption: “Original missing after delivery.” That is Mamiya’s claim. The two hands are never shown together in an uninterrupted shot.

Aya Do not give the three pieces to three recipients. Keep them together. And… do not trust me if I say I did nothing. I cannot say the rest yet.

Mamiya She admits handling the material. There are independent records from four theatres. You need not judge her motives. Finish the first view.

Read the dialogue and the two work-sheet boxes. They contain claims to test, not venue information. You need not decide who is good or bad. Keep the original scene pieces and begin Stop 1.

[Fictional production claim] “Every reference comes directly from one unaltered location reel filmed in 1930, with no later material inserted. Kisho-za, Hisamatsu-za, Chitose-za and Meiji-za were four independent theatres operating simultaneously that year, each receiving the scene. Pending: modern visitors’ reconstruction account.” These are claims to investigate, not historical facts.

[Work-sheet margin] “CAPTURE AT: arrange the scene with the indicated foreground and background. Use the four names as captions. Take one: Aya lifts the frame. Take two: change the caption, then another hand receives a packet. Omit the reset between takes.” Mamiya calls this an ordinary convention for reconstructing the past.

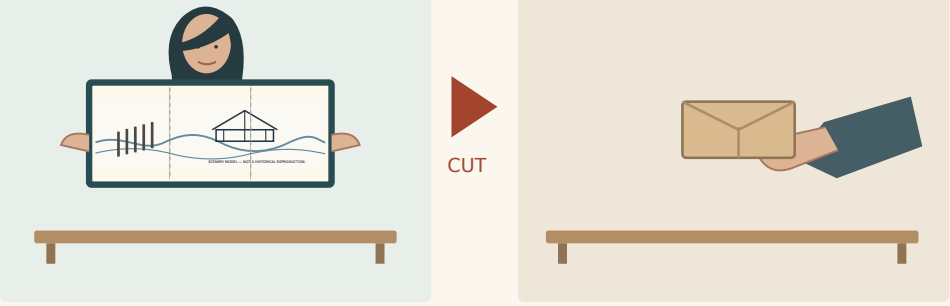

01 · The moment you assembled it

Public street corner outside the Button Museum building · 1-11-8 Nihonbashi-Hamacho

> **Mamiya** Three pieces, three deliveries. Fill the hidden parts and each can go separately.
>
> **Aya** You need not trust me. Just look first: is the paper missing, or is something in front of it?

Picture-button techniques can combine painted surfaces to create depth. Aya adapted that viewing method for this paper scene; it is not a museum object. At the street corner, the tower, sign and roof each involve one thing hiding another. Mamiya wants each incomplete view treated as a separate address.

Were these hands in the same scene?

No uninterrupted shot shows a hand-to-hand transfer.

Original storyboard · not a live feed, source recording or site photograph

> Find the order of the three views, keeping the occlusions. Join the three scene strips in the same order inside the original frame.

Do not invent hidden lettering, cross into traffic or move signs. If the view is unavailable, use the card illustration as a marked substitute.

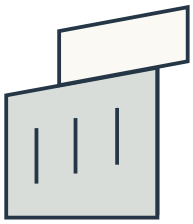

History cards for this stop: B02, F01 · p. 19 onward. All necessary facts are printed; no network is required.

Find the order of the three views, keeping the occlusions. Join the three scene strips in the same order inside the original frame.

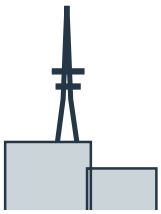

01A · View cards

Materials and answers

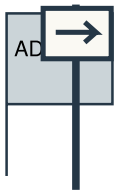

Building / roof edge

Distant tower / nearer block

Traffic sign / advertisement

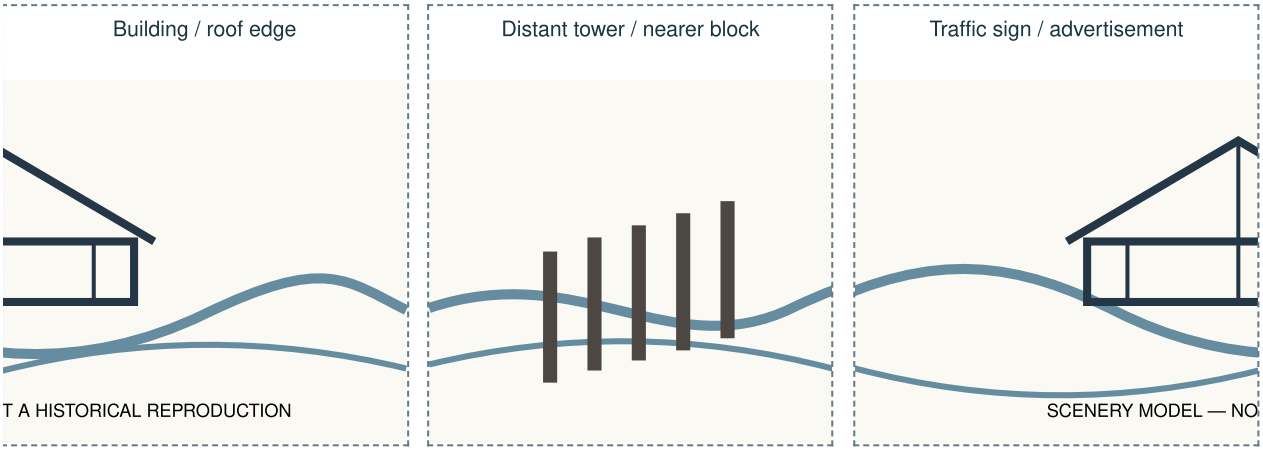

Order: _____ → _____ → _____

Which reading is justified?	☐ Keep the foreground: the layers belong to one view ☐ Invent the missing text and treat each as an address ☐ Move the real sign to reveal the view

For optional help, turn to p. 25 and open hints 1, 2 and 3 only as needed. After answering, use p. 26 to check and read the consequence.

01B · Scene and frame

Cut the three scene strips and join them horizontally in the view-card order. Do not cut objects out of the illustration.

JOIN THE THREE STRIPS INSIDE THIS FRAME

[Fictional production claim] “Every reference comes directly from one unaltered location reel filmed in 1930, with no later material inserted. Kisho-za, Hisamatsu-za, Chitose-za and Meiji-za were four independent theatres operating simultaneously that year, each receiving the scene. Pending: modern visitors’ reconstruction account.” These are claims to investigate, not historical facts.

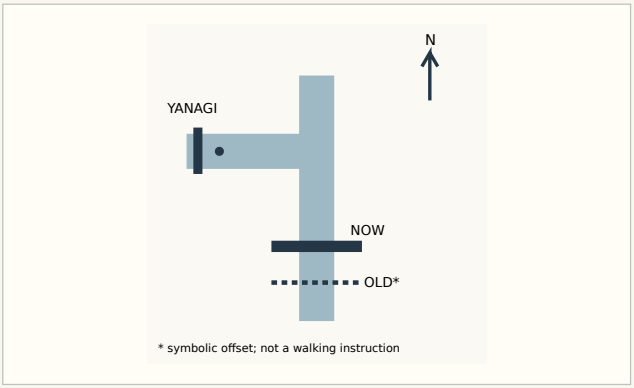

02 · Two names, one river

Ryogoku Bridge public pavement and visible river junction · do not spread the kit across the walkway

> **Mamiya** The Sumida section is confirmed. Inase is a second handoff. Do not combine those shots.
>
> **Aya** I wrote that name. It was a stage caption, not a delivery address.

Use the river mouth, tributary and information about the historical piles to orient the card. The National Theatre explains that Kosode Soga Azami no Ironui calls its stage setting “Inase River” while borrowing the Sumida scenery associated with the piles. A stage name and a source location can both be valid.

A view with a changed name

Caption: Inase

Which river is here?

Original storyboard · not a live feed, source recording or site photograph

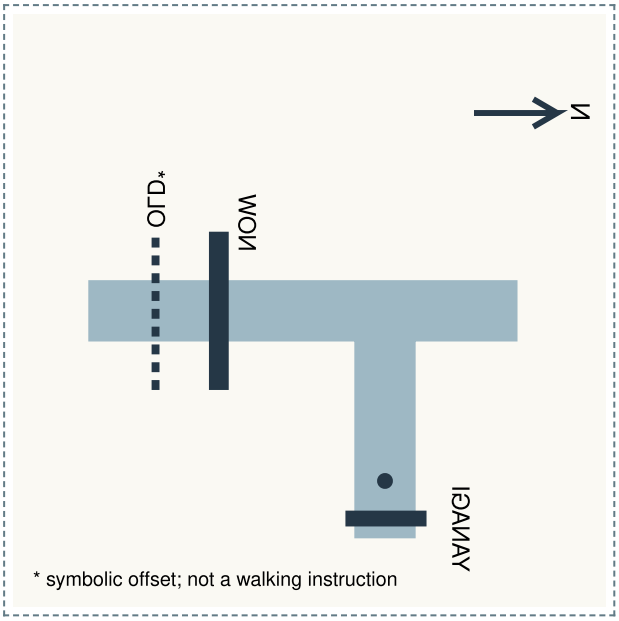

> Rotate and flip the river card to align the main river, tributary and bridges. Assign the stage caption and real-source caption separately.

Neither name needs to be erased. The diagram shows relationships; old and current bridges cannot be matched pixel for pixel.

History cards for this stop: R02, R01, M01 · p. 19 onward. All necessary facts are printed; no network is required.

Rotate and flip the river card to align the main river, tributary and bridges. Assign the stage caption and real-source caption separately.

02A · River card

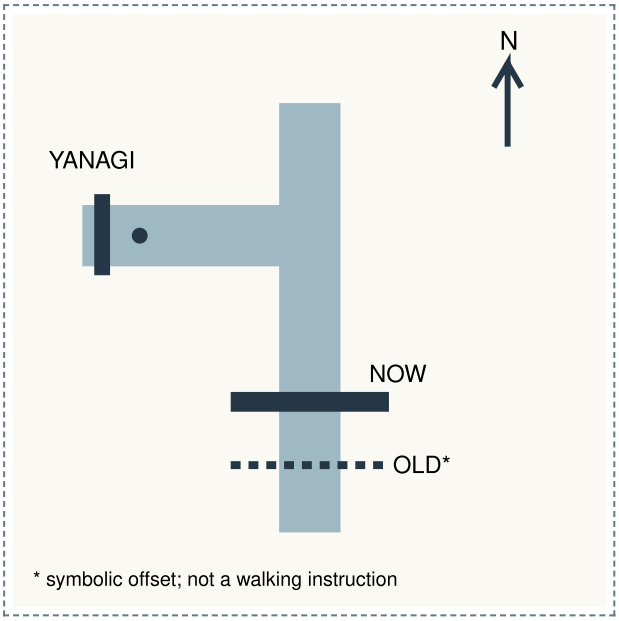

Rotate the card and compare the main river, tributary, bridges and north. The alternate face is on the next page; no duplex registration is needed.

Stage name	☐ Inase River ☐ Sumida River
Real scenery	☐ Sumida River ☐ Inase River

For optional help, turn to p. 27 and open hints 1, 2 and 3 only as needed. After answering, use p. 28 to check and read the consequence.

02B · Alternate face and labels

稲瀬川 / INASE

隅田川 / SUMIDA

STAGE NAME: _____

REAL SCENERY: _____

N north; YANAGI Yanagi Bridge; NOW present Ryogoku Bridge; OLD symbolic old bridge. Spread pieces only where stopping is permitted and traffic stays clear.

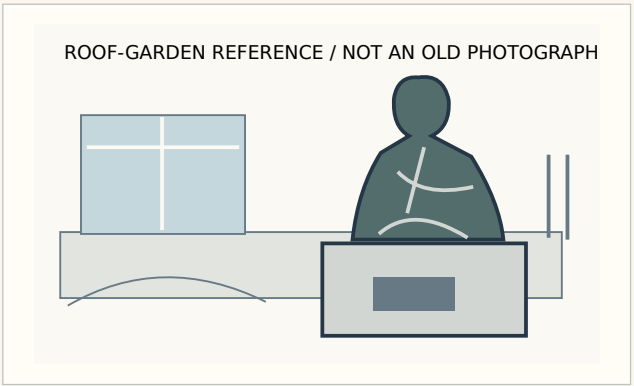

03 · An old poet cannot date a photograph

Basho-an historic observation garden · free roof garden at the annex, 1-1-3 Tokiwa

> **Aya** I know I made the paper scene now. He guaranteed all my references came from one 1930 reel. When I asked whether the garden view was a later addition, he said a place commemorating an old poet was already old. I did not ask again.
>
> **Mamiya** You came to restore an old view, not turn every date into an objection.

Basho moved to Fukagawa in 1680. The observation garden on today's annex roof opened in April 1995. The reference explicitly depicts this modern commemorative setting, not Basho himself or his Edo-period hut. Mamiya claims it belongs with the other references in the same unaltered 1930 reel.

An old subject — but when was this view possible?

- The poet's life
- The memorial's history
- Image date unresolved

Original storyboard · not a live feed, source recording or site photograph

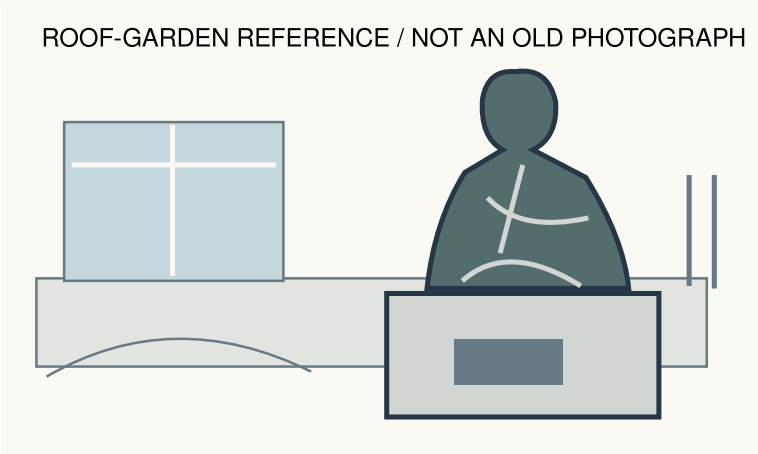

> Separate the date in the poet's life from the date of the setting. State the photographic lower bound, and no more.

1995 or later does not mean exactly 1995, or establish anyone's survival or current location. You are checking the reference image and the claim made about the whole reel.

History cards for this stop: H07, H01, H02 · p. 19 onward. All necessary facts are printed; no network is required.

Separate the date in the poet's life from the date of the setting. State the photographic lower bound, and no more.

03A · Two timelines

PERSON: Basho moves to Fukagawa _____

SETTING: this garden can be photographed _____

LOWER BOUND: no earlier than _____; exact year unknown.

Basho moved to Fukagawa	☐ 1680 ☐ 1930 ☐ 1995
Lower bound for a photograph of this setting	☐ 1930 ☐ 1981 ☐ 1995
What does this lower bound establish?	☐ 1995 or later; not the exact year ☐ Exactly 1995 ☐ It commemorates an old person, so 1930 must be valid

Choose after checking

□ We will align the diagram ourselves

□ Exchange Aya’s alignment notes

For optional help, turn to p. 29 and open hints 1, 2 and 3 only as needed. After answering, use p. 30 to check and read the consequence.

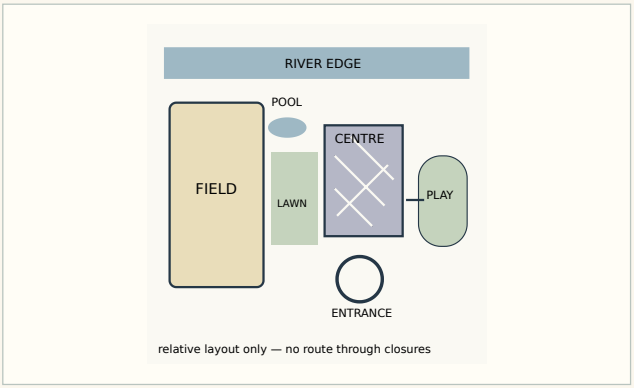

04 · Stand on the camera side

Hamacho Park map and permitted public path on the playground side

> **Mamiya** Take the frame to that building. Complete the delivery and Aya can explain herself.
>
> **Aya** If I follow his wording again, he gets material for a second “delivery.” Read the diagram first.

Hamacho Park opened in 1929 as a reconstruction park. An old view is not a survey of today’s layout. The current map and diamond-pattern facade reference concern the sports centre. CAPTURE AT marks the camera end of the work sheet; Mamiya’s retelling turns the building into the receiving end.

A destination — or the start of a camera view?

CAPTURE AT

Align the viewpoint

Original storyboard · not a live feed, source recording or site photograph

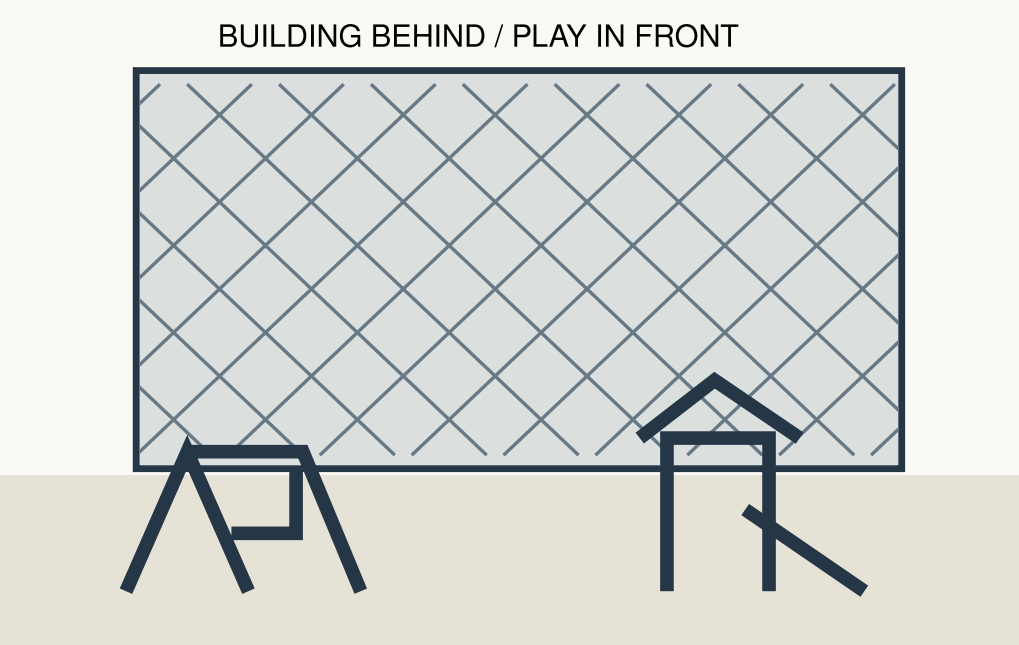

> Align the park card and place the camera marker on the side that produces the reference’s depth. Identify the building and the sheet’s purpose. Then arrange the paper frame at a safe stopping place; do not carry it into the building.

Cross-check the modern river side, field and sports centre. The year 1929 does not supply an orientation. Diagram lines are not access routes. Use the supplied view if barriers prevent observation.

History cards for this stop: P01, P02, M03, M04, P06, P04 · p. 19 onward. All necessary facts are printed; no network is required.

Align the park card and place the camera marker on the side that produces the reference’s depth. Identify the building and the sheet’s purpose. Then arrange the paper frame at a safe stopping place; do not carry it into the building.

04A · Facade and viewpoint

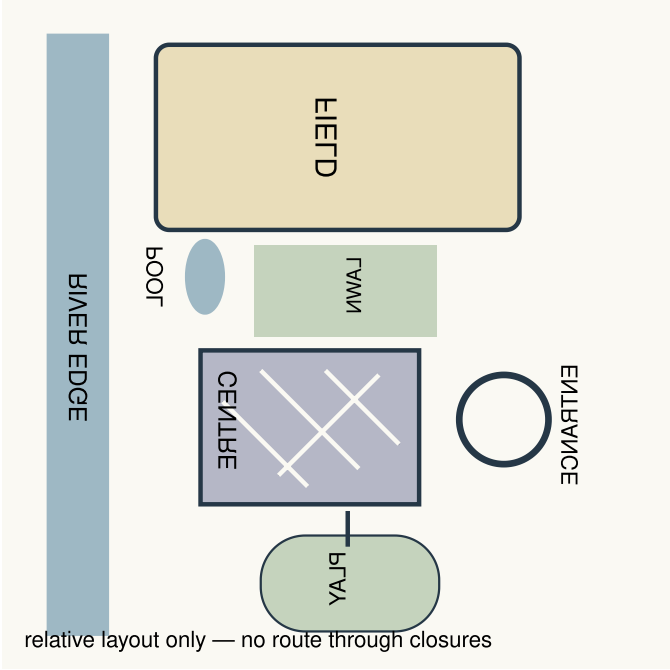

Which camera side gives the reference view?	☐ Playground side ☐ River side ☐ Circular-entrance side ☐ Large-field side
Building in the reference	☐ Sports centre ☐ Meijiza
Purpose of this page	☐ CAPTURE AT: view location ☐ DELIVER TO: recipient address

For optional help, turn to p. 31 and open hints 1, 2 and 3 only as needed. After answering, use p. 32 to check and read the consequence.

04B · Park cards and camera markers

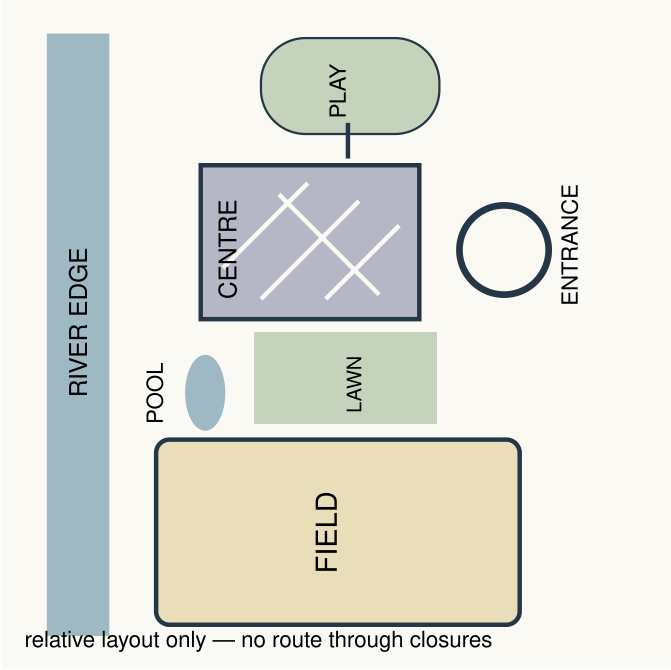

Clip A and B back-to-back to simulate turning, or rotate them separately. Compare river edge, field and sports centre. Diagram lines are not real access routes.

A

relative layout only — no route through closures

B

relative layout only — no route through closures

□ PLAYGROUND SIDE	□ RIVER SIDE
□ CIRCULAR ENTRANCE	□ FIELD SIDE
CAPTURE AT VIEW FROM HERE	DELIVER TO DELIVER HERE

Open only if you selected shared calibration

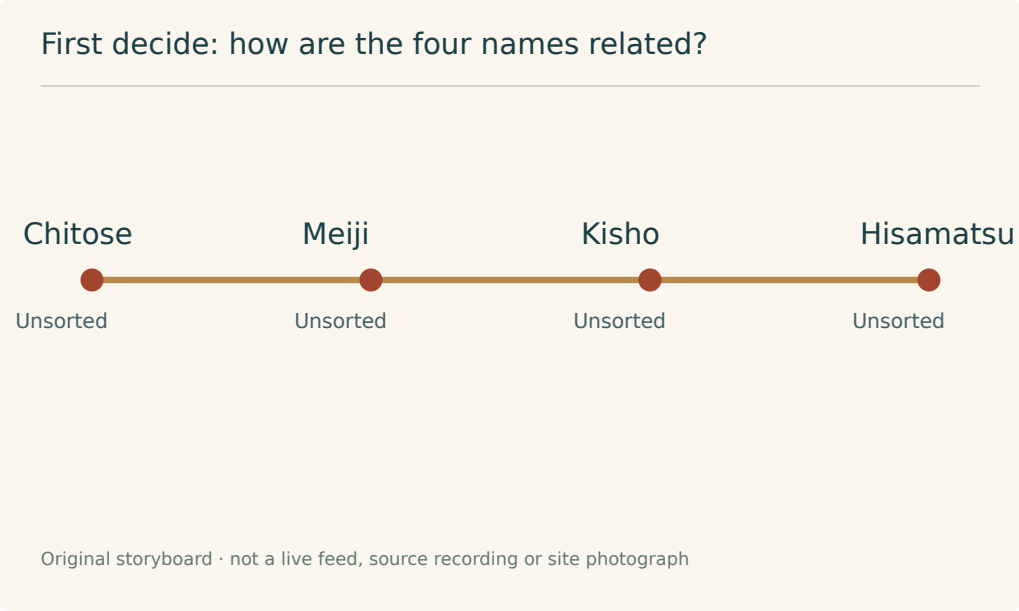

Turn Face B a quarter-turn clockwise: river edge above, field left, sports centre right. You still determine camera side and purpose.

05 · Four names are not four witnesses

Public pavement outside Meijiza · check the exterior sign, then move clear of the entrance

> **Mamiya** You have checked one place. The other three are gone; naturally you cannot find them.
>
> **Aya** He wants us looking for the next recipient who can never answer. But do these names describe four separate parties?

The theatre's history reaches back to open-air playhouses in west Ryogoku. Kisho-za, Hisamatsu-za, Chitose-za and Meiji-za appear in sequence; 1928 records relocation and reopening. Today's real theatre is neither a game collection desk nor anyone's accomplice.

> Arrange the four name strips in historical order. Place 1928 on the location track. Identify the current theatre while keeping name changes separate from relocation.

Test Mamiya's explicit claim of four independent theatres existing simultaneously in 1930. A name history cannot prove four modern accounts share an owner or establish any real theatre's conduct.

History cards for this stop: M01, M02, M03, M04, M07, M05 · p. 19 onward. All necessary facts are printed; no network is required.

Arrange the four name strips in historical order. Place 1928 on the location track. Identify the current theatre while keeping name changes separate from relocation.

05A · Names and location

Chitose-za · 1885

Meiji-za · 1893

Kisho-za · 1873

Hisamatsu-za · 1879

1928 · RELOCATION & REOPENING

NAME HISTORY: _____ → _____ → _____ → _____

LOCATION HISTORY: _____

Where does 1928 belong?	☐ Relocation/reopening within the identity history ☐ A fifth theatre name

For optional help, turn to p. 33 and open hints 1, 2 and 3 only as needed. After answering, use p. 34 to check and read the consequence.

Finally: restore the part that was cut away

The final action

The scene, river names, date, viewpoint and recipient identity can now form one account. Preserve the complete production process; do not invent a claim that somebody never touched the material. Complete the original seven conclusions and choose an independent or joint signature. Both receive the full truth.

Nothing is handed to a real venue and no real accusation is sent. Teams who solved early can replay the complete ending immediately.

For paper play, complete the seven conclusions on the next page and use the final solution page if needed. All assistance is free. Then replay the six acts with the existing pieces, without filming or mailing anything. An early solution may complete the ending first and revisit unread chapters afterward.

Your complete account

Real river used as source	☐ 隅田川 / Sumida ☐ 稲瀬川 / Inase
Stage name of the borrowed view	☐ 稲瀬川 / Inase ☐ 隅田川 / Sumida
Nature of the current work sheet	☐ A contemporary work sheet borrowing historical scenery and names ☐ An unaltered original reel from 1930
Lower bound of the garden reference	☐ 1995 or later, not an exact date ☐ Exactly 1995
What the park work sheet directs	☐ Film toward the sports centre from the playground side ☐ Deliver the paper scene to the sports centre
Current counterpart of the name history	☐ 明治座 / Meijiza ☐ 千歳座 / Chitose only ☐ 芭蕉纪念馆 / Basho Museum
Where this account is submitted	☐ Submit only to the game host through the case receipt ☐ Enter with the prop or ask real theatre staff to sign

□ Independent signature: our observations only

□ Joint signature: Aya and we each own our part

All seven conclusions lead to the ending. No chapter stamps are required; a correct early solution is accepted. Solution check: p. 35

History cards · 1

Distinguish facts from fictional claims

B02 · Button Museum: collection

The museum describes eighteenth-century English picture buttons painted on plates and the back of glass to suggest depth. This fact comes from the collection text, not a free outdoor display. The game drawings and strips are original.

https://button-museum.jp/item/

F01 · 既有街角实拍研究 / Existing corner-evidence review

Uses the continuous-view and overlap observations in evidence/02_SITE_BY_SITE_CROSSCHECK.md. Private JPEG/MP4 pixels were not reobtained or re-examined this session. No originals are published; hidden lettering is not reconstructed from OCR.

R02 · National Theatre: stage names and river piles

Kosode Soga Azami no Ironui uses the stage name Inase for Sumida scenery associated with the piles. This game does not merge that scene with The Five Thieves.

https://www2.ntj.jac.go.jp/dglib/contents/learn/edc17/sakuhin/d2/b.html

R01 · 墨田区观光协会：旧两国桥 / Old Ryogoku Bridge

The old bridge was about 50 metres downstream of the present one; the riverbank has a history of sideshows and stalls. The game does not precisely overlay old and new bridge positions or count modern railings as historical piles.

https://visit-sumida.jp/spot/6182/

History cards · 2

Distinguish facts from fictional claims

H07 · Koto City: Basho and Fukagawa

Basho moved from Nihonbashi to Fukagawa in 1680. This belongs to his life, not to the creation date of the present garden, statue or reference view.

https://www.city.koto.lg.jp/promotion/kotocity/bashou.html

H01 · Basho Museum: outline

The main museum opened in 1981, the annex in January 1995 and its roof observation garden in April 1995. The garden is free, has published hours of 09:15–16:30 and covers 101.88 square metres. A reference showing this setting can establish only a lower bound of 1995 or later.

https://www.kcf.or.jp/basho/outline/

H02 · 江东区：芭蕉记念馆 / Koto City garden access

The free garden is at 1-1-3 Tokiwa, distinct from the main museum at 1-6-3. Official information lists the second and fourth Mondays as closed, or the next day when a holiday falls on the Monday. Temporary notices take priority. The old hut and modern memorial are different.

https://www.city.koto.lg.jp/promotion/spot/basho.html

P01 · Tokyo Metropolitan Library: Hamacho Park

Hamacho Park opened in 1929 as one of the three major reconstruction parks. This does not supply a modern diagram orientation or an open route.

https://www.library.metro.tokyo.lg.jp/portals/0/tokyo/chapter2/park14.html

History cards · 3

Distinguish facts from fictional claims

P02 · 内閣府：帝都復兴 / Cabinet Office reconstruction history

Reconstruction reshaped blocks, roads, bridges and parks. This puzzle does not use an unavailable precise historical plan or infer underground caches, fountain foundations or 1929 facility coordinates.

https://www.bousai.go.jp/kohou/kouhoubousai/r05/108/special_01.html

P06 · Inherited field-observation report

The inherited field-review report records the park map, sports-centre facade and depth relationships. This release uses that report, not a claimed new inspection of the original photographs. Diagrams are original simplifications.

P04 · Chuo City: partial park closure

Official notice rechecked on 21 October 2026: parts of the park are out of use through fiscal 2030. Follow current barriers; a map does not prove a route is open.

https://www.city.chuo.lg.jp/a0037/machizukuri/kouenryokka/kouen/oshirase/hamachosyuuhen.html

M01 · Meijiza: Kisho-za era

The official history traces the predecessor to the open-air San Kyodai playhouses of west Ryogoku and the opening of Kisho-za in 1873. This connects the riverside history with the endpoint; it does not put the 1873 theatre at today’s bridgehead.

https://www.meijiza.co.jp/anniversary/era1.html

History cards · 4

Distinguish facts from fictional claims

M02 · Meijiza: Hisamatsu-za era

The theatre opened under the Hisamatsu-za name on 6 August 1879. This is institutional history, not proof of an unchanged building.

https://www.meijiza.co.jp/anniversary/era2.html

M03 · Meijiza: Chitose-za era

The theatre used the name Chitose-za from 1885. The subsequent Meiji-za belongs to the same historical sequence.

https://www.meijiza.co.jp/anniversary/era3.html

M04 · The opening of Meiji-za

The theatre opened under the Meiji-za name in 1893. Kisho → Hisamatsu → Chitose → Meiji is the historical sequence, not a continuous camera view across locations.

https://www.meijiza.co.jp/anniversary/era4.html

M07 · Meijiza in the Showa era

After the earthquake the theatre moved near present-day Hamacho Park and reopened on 4 March 1928. This is relocation/reopening, not a fifth name, and does not show that the park viewpoint also frames the theatre.

https://www.meijiza.co.jp/anniversary/era7.html

Your choice after Stop 3

After Stop 3, read only the response you selected

We will align the diagram ourselves

Aya closes her orientation notes. “You need not trust me first. Align it, and I will repeat the action from the position you establish.” The park diagram starts unaligned. Her decision to release the complete record is unchanged.

Exchange Aya’s alignment notes

Aya shares the large-anchor notes. “Align river side, field and building first. You still decide the camera side and purpose.” The park diagram starts aligned. Sharing does not mean vouching for her.

Hints 01

Reveal as needed; the full solution is on a separate page

On paper, fold backward at the dashed lines to cover unused hints below. On screen, expand them individually. All three are free.

Free hint 1

The cards belong to one continuous view. Distinguish the distant landmark, the nearer traffic sign and the museum building edge.

Free hint 2

Put the distant-tower card at the start and the building/roof edge at the other end. The traffic-sign card joins them. The gap behind the sign is an overlap.

Free hint 3

Tower → sign → building/roof. Keep the foreground overlap. Join the matching river strips in that order without inventing obscured text.

Solution and consequence: p. 26

Consequence 01

Read after answering · contains this stop's solution and consequence

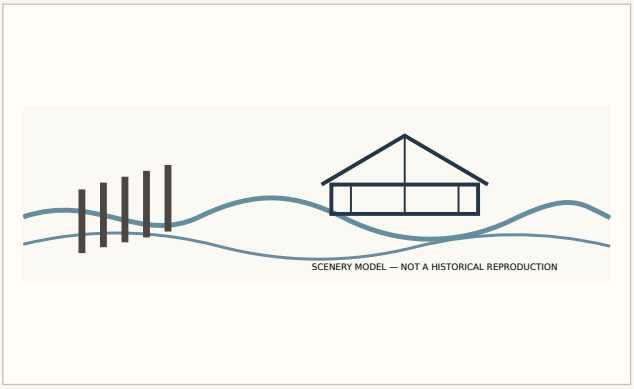

Complete solution

Distant tower / nearer block → Traffic sign / advertisement → Building / roof edge

Which reading is justified?: Keep the foreground: the layers belong to one view

The pieces form one scene. You keep the set together instead of handing out three parts. Mamiya immediately places "scene reconstruction complete" beside the edit accusing Aya, as though you confirmed a delivery. He has changed the meaning of your correct action.

The intact scene stays with you

One frame

Keep the foreground

No separate deliveries

Original storyboard · not a live feed, source recording or site photograph

Your team We confirmed how it fits, not who received it.

Mamiya Then we still need the remaining checks. Finish the route and there will be no ambiguity.

Aya Keep the frame. I want to see how many other words he has put into your hands.

The next caption says "Inase River." At Ryogoku Bridge, compare the actual river: does that name require a different destination?

Hints 02

Reveal as needed; the full solution is on a separate page

On paper, fold backward at the dashed lines to cover unused hints below. On screen, expand them individually. All three are free.

Free hint 1

A vertical main river is not enough: a mirror image can do that too. Check which bank the tributary enters from and which river Yanagi Bridge crosses.

Free hint 2

Restore north to the top and match the main river, tributary and both bridges together. The stage caption does not have to become the real place name.

Free hint 3

Use the canonical orientation, without mirroring. Stage: Inase. Real scenery: Sumida. On paper, change to the correct face and rotate until all three anchors match.

Solution and consequence: p. 28

Consequence 02

Read after answering · contains this stop's solution and consequence

Complete solution

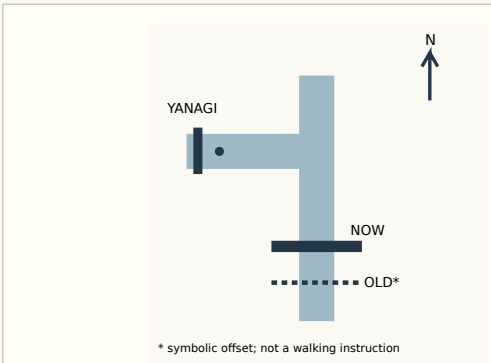

Card reference: orientation 0, unmirrored; verify against the diagram anchors.

Stage name: Inase River

Real scenery: Sumida River

You keep both captions beside the same river and remove the proposed journey to another river. Borrowed scenery does not establish two handoffs in different places; it explains why the same view can change its caption. Aya keeps her original notation but refuses to call it an address.

Stage and source have separate places

Stage: Inase

Source: Sumida

Not two deliveries

Original storyboard · not a live feed, source recording or site photograph

Mamiya Kabuki borrows names. That does not make an entire reel false.

Your team Correct. A borrowed name proves neither forgery nor delivery. We will check the date you attached to it.

Aya There is another reference: the Basho garden. He has treated an old subject as an old photograph.

Take the claim "unaltered original photography from 1930" to the free Basho observation garden. Check the earliest date its depicted setting could have existed.

Hints 03

Reveal as needed; the full solution is on a separate page

On paper, fold backward at the dashed lines to cover unused hints below. On screen, expand them individually. All three are free.

Free hint 1

An old historical figure does not make a view containing this modern garden equally old. Check the two timelines separately.

Free hint 2

1680 belongs to Basho’s move. 1995 belongs to this observation garden. 1981 is the main museum’s opening, not this garden’s.

Free hint 3

Choose 1680, 1995, and “1995 or later”. This rules out the reference being a 1930 original photograph; it does not identify its exact year, maker or a live location.

Solution and consequence: p. 30

Consequence 03

Read after answering · contains this stop's solution and consequence

Complete solution

Basho moved to Fukagawa: 1680

Lower bound for a photograph of this setting: 1995

What does this lower bound establish?: 1995 or later; not the exact year

The claim about the whole reel fails. Mamiya now says a modern reshoot can faithfully reconstruct 1930. It may be a creative reconstruction; it cannot be an unaltered original record from that year. Aya finally releases the production record she has withheld. It preserves the actions before and after the two shots used in the opening edit: she lifts the frame and puts it back; the receiving hand belongs to a separate take. Between them is the instruction to change the caption, matching the work sheet Mamiya supplied at the start. This record concerns that particular edit; it was not newly written for your demonstration.

Aya I cut the first version. I thought we were demonstrating borrowed scenery. Later I learned he would call my action theft. Today I wanted you to say I never touched it. That would also have been a lie.

Your team Then we will not say it. Keep the whole account of what you did after touching it.

Aya I will return to the camera side. This time the reset stays in.

The objective has changed: preserve how this particular image was made and withdraw the borrowed witness account. At Hamacho Park, decide whether the work sheet directs filming or a delivery.

Midgame responses: p. 24

Hints 04

Reveal as needed; the full solution is on a separate page

On paper, fold backward at the dashed lines to cover unused hints below. On screen, expand them individually. All three are free.

Free hint 1

Match river edge, field and sports centre together. Matching only the river may leave a mirror image. The historical date 1929 cannot orient today’s map for you.

Free hint 2

In the canonical diagram the river edge is above, the field left and the sports centre right, with the playground beyond it. The foreground tells you which side the observer is on.

Free hint 3

Use the canonical orientation without mirroring. Select playground side, sports centre and CAPTURE AT. Keep the foreground; the sports centre is neither the theatre nor a delivery destination.

Solution and consequence: p. 32

Consequence 04

Read after answering · contains this stop's solution and consequence

Complete solution

Card reference: orientation 0, unmirrored; verify against the diagram anchors.

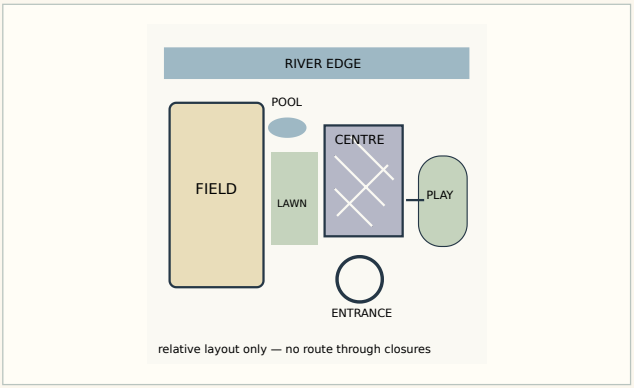

Which camera side gives the reference view?: Playground side

Building in the reference: Sports centre

Purpose of this page: CAPTURE AT: view location

The camera belongs on the playground side facing the sports centre. This is a view, not a delivery. First compare Aya's production record with the opening shots: putting the frame back, changing the caption and separately filming a receiving hand were edited into an apparent handoff. Now place the camera marker at the diagram's edge, join the strips in the frame and repeat the recorded actions: lift, put back, change the caption, start a separate take. You are reconstructing this particular production record. The demonstration explains how the edit misleads; the original record identifies the separate actions used in this edit. Neither proves that no other delivery ever occurred anywhere.

Restore the filming instruction

Camera: playground

Background: sports centre

Action: capture

Original storyboard · not a live feed, source recording or site photograph

Aya Look: the frame returns. I lift it and I put it down. The receiving hand comes from a different take.

Mamiya Production and delivery paperwork are different matters. You cannot simply erase four recipients' records.

Aya That part is true. Our demonstration alone does not prove no delivery ever happened. Then put your four claimed institutions on one timeline.

Go to the public pavement outside Meijiza. The four names listed from the beginning: were they simultaneous independent recipients, or something else?

Hints 05

Reveal as needed; the full solution is on a separate page

On paper, fold backward at the dashed lines to cover unused hints below. On screen, expand them individually. All three are free.

Free hint 1

Separate the four names from the event about location. A move does not create another theatre name.

Free hint 2

Kisho comes before Hisamatsu; Chitose before Meiji. The west-Ryogoku playhouses are the predecessor in this history.

Free hint 3

Kisho-za 1873 → Hisamatsu-za 1879 → Chitose-za 1885 → Meiji-za 1893. Put 1928 under relocation/reopening. The present counterpart is Meijiza; the game host receives your actual receipt.

Solution and consequence: p. 34

Consequence 05

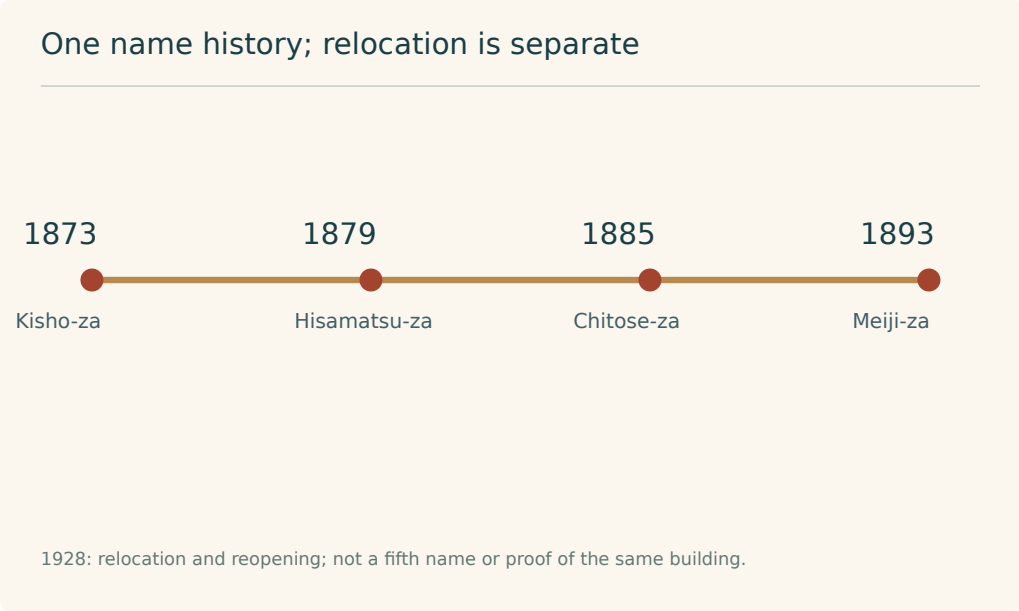

Read after answering · contains this stop's solution and consequence

Complete solution

Kisho-za · 1873 → Hisamatsu-za · 1879 → Chitose-za · 1885 → Meiji-za · 1893

Where does 1928 belong?: Relocation/reopening within the identity history

Kisho → Hisamatsu → Chitose → Meiji is one historical sequence; 1928 belongs on the relocation track. Mamiya's claim of four independent simultaneous theatres fails. Put the strips on one line. Do not let fictional responsibility pass between those names, and do not direct blame at the real Meijiza.

Mamiya I can withdraw the version accusing her and replace it with "Aya never touched the original." Return the original pieces and the complete production record to me, and stop there. That ends it today. Wasn't ending this for her what you wanted?

Aya I touched it. I filmed it. I even cut it. You want a convenient sentence. We brought back the whole sequence.

Your team No one needs to invent a clean past for anyone. First, finish the account of what did happen.

Keep the frame, scene strips, river captions, camera marker and theatre-name strips. From a safe stopping place, put the opening edit beside the complete production account.

The finale

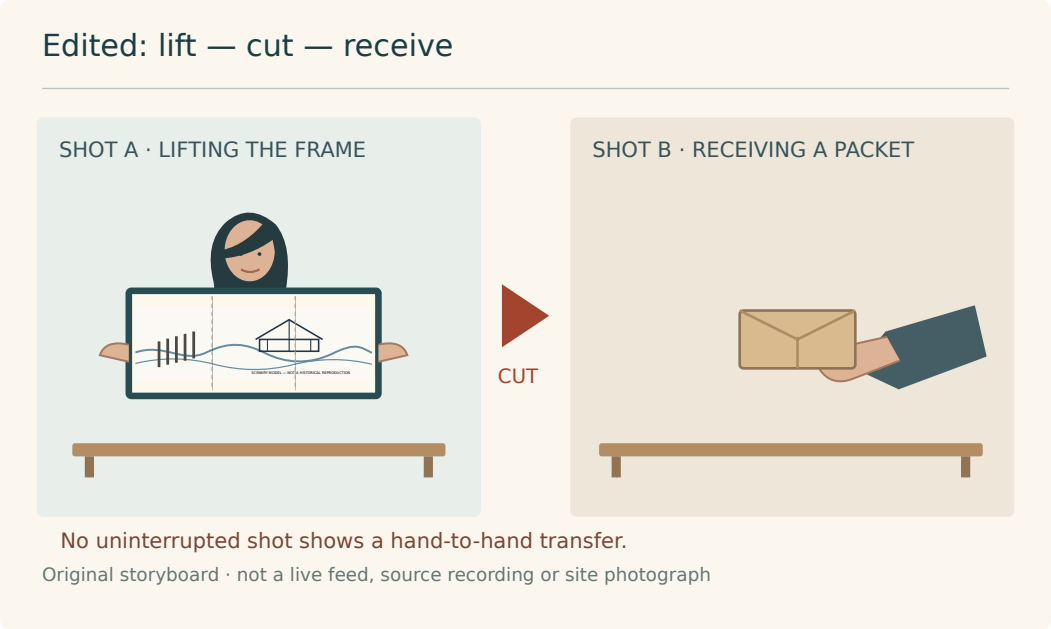

Finale solution · contains final answers

Real river used as source	隅田川 / Sumida
Stage name of the borrowed view	稲瀬川 / Inase
Nature of the current work sheet	A contemporary work sheet borrowing historical scenery and names
Lower bound of the garden reference	1995 or later, not an exact date
What the park work sheet directs	Film toward the sports centre from the playground side
Current counterpart of the name history	明治座 / Meijiza
Where this account is submitted	Submit only to the game host through the case receipt

Use the complete answer as assistance if needed; the truth, ending and souvenir remain complete. Continue at p. 36 and read in order.

Act 1 · Watch the accusation again

FINALE · Read in order

Mamiya repeats the opening edit: Aya lifts the frame — cut — another hand receives a packet. Beneath it waits his prewritten “independent witness” box, ready to turn a reconstruction into a delivery. Now rejoin the original strips in this order: tower → traffic sign → building/roof. Keep the complete scene in your hands.

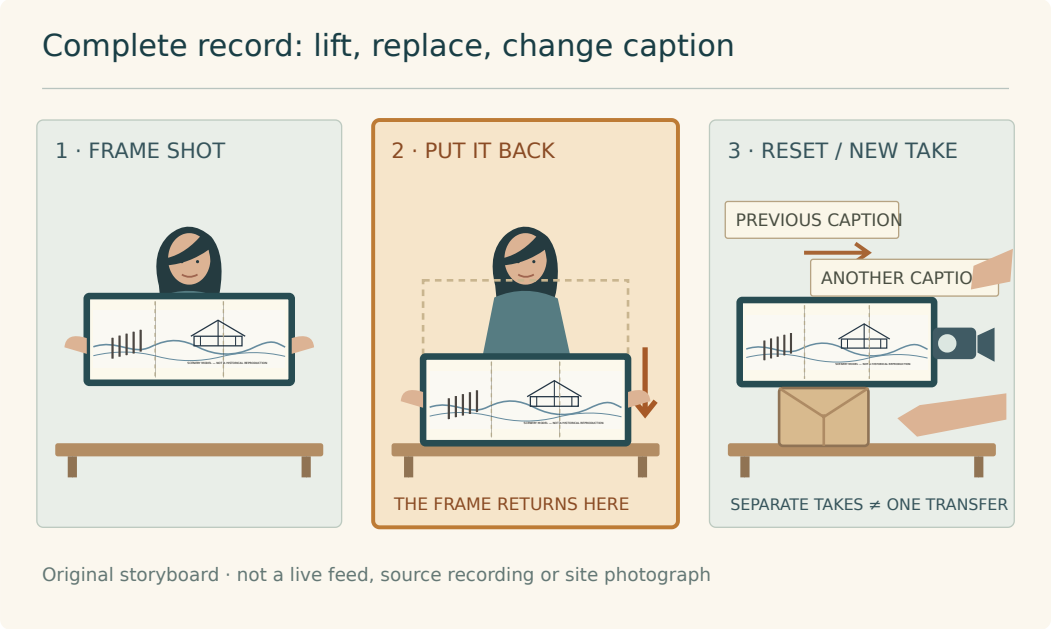

The image shows Aya handling a frame. It does not continuously show her handing it to the other person.

> **Mamiya** She admits touching it. What more do you need?
>
> **Aya** Between touching it and giving it to somebody, you removed an interval.

Join the original strips in this order: tower → traffic sign → building/roof. Keep them in the frame. Early solvers can replay the action directly; no earlier stage must be completed.

Act 2 · Keep the interval

FINALE · Read in order

Aya opens the complete production record corresponding to the work sheet shown at the start: she lifts the frame; returns it to its original position; removes her hand; changes the caption; a separate take shows a hand receiving a prop packet. The reset between takes remains visible. No continuous shot joins the two hands.

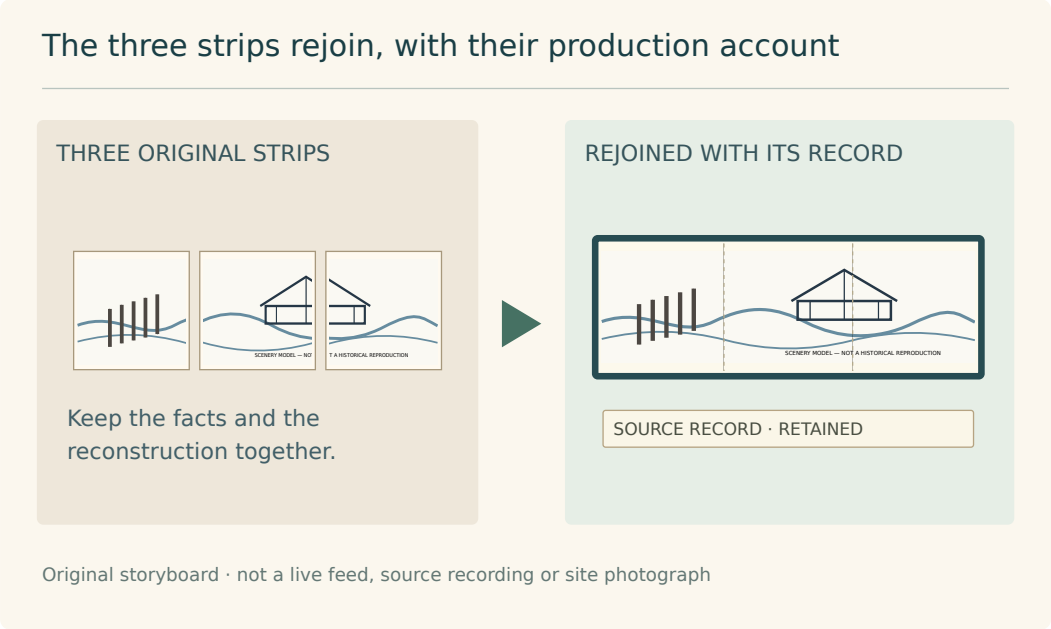

The park alignment explains how this work sheet was executed. Aya's retained record and account connect a possible method to this particular edit. They do not prove that no other handoff could ever have occurred.

> **Aya** I built this scene. I cut the first version, too. But I did not hand it to that person in this footage. Do not delete my first two sentences.

Lift the complete frame, replace it in the same place and remove your hands. Then move only the paper caption. Read: "This is a reset between takes, not a delivery route into the building." No real video recording is required.

Act 3 · Give every borrowed thing its proper place

FINALE · Read in order

Place “Inase” and “Sumida” beside the same scene: stage name and source place. Separate 1680 from 1995: a date in Basho’s life and the modern commemorative setting in the reference. Keep the camera marker at the park diagram’s filming end.

The history was not fabricated. What changed was the meaning assigned to it. Mamiya joined real relationships into a delivery they did not establish.

We will align the diagram ourselves

Set the park diagram to its standard, unmirrored orientation and put the camera on the playground side. You can check each relationship independently. Aya explains how she filmed from it, without asking you to treat her word as a compass.

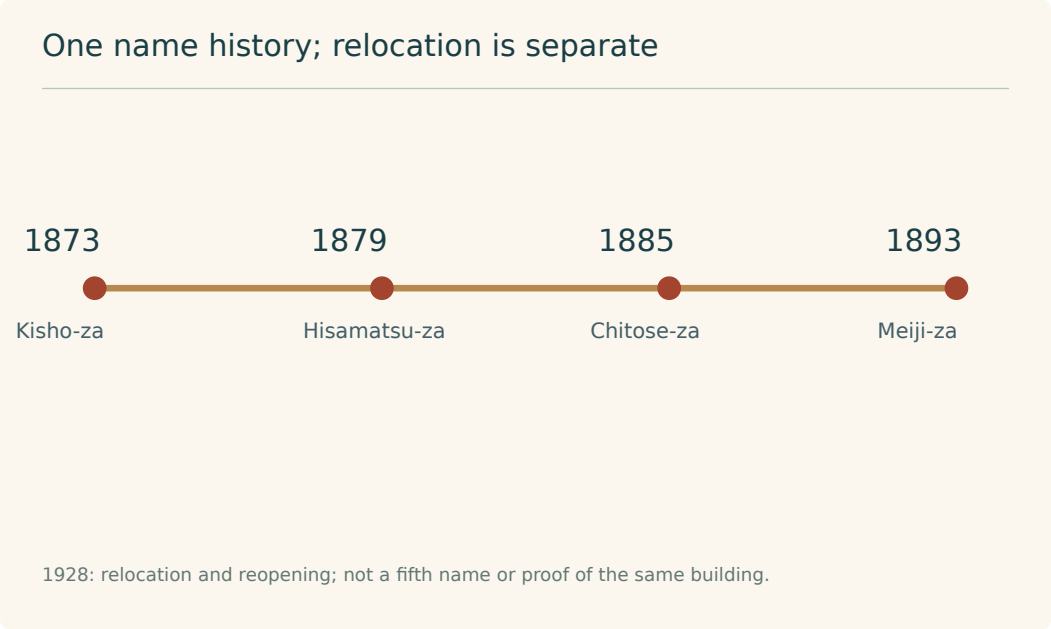

Exchange Aya’s alignment notes

Aya includes her alignment notes: standard orientation, no mirror, camera on the playground side. Distinguish information she supplies from observations you check yourselves. Exchanging information preserves its source.

Place the Inase and Sumida labels together. Put 1680 on the life track, 1995 on the setting track and 1995 or later on the photographic lower-bound strip. Put the camera on the playground side of the standard, unmirrored park diagram. Use the original pieces; do not cut new cards.

Act 4 · There is no fifth recipient

FINALE · Read in order

Mamiya tries one last time to pass responsibility to “the other three.” Join Kisho, Hisamatsu, Chitose and Meiji in one historical sequence, with 1928 separately under relocation. They cannot serve as four independent theatres operating simultaneously in 1930. A move does not create a fifth recipient.

This defeats his claimed corroboration; it accuses no real venue. Meijiza continues its own ordinary day. Your case concludes on paper and screen.

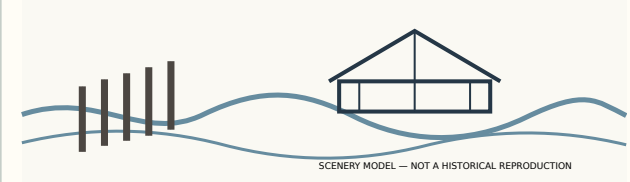

> **Mamiya** The names are correct. So is the scenery. Must you make the film look this bad?
>
> **Aya** It need not look bad. Keep the moment I put it back. Then it shows what I actually did.

Place the four names on one line, with 1928 on the location track beside it. Do not use the props for theatre entry.

Act 5 · What changes now

FINALE · Read in order

Three changes that have happened

- Misleading edit withdrawn
- Second handoff shoot cancelled
- Complete record returned

Original storyboard · not a live feed, source recording or site photograph

Inside the story, the production team receives your account and Aya's retained production record. The "independent witness" edit is withdrawn; the planned second "delivery" using the same method is cancelled. The strips stay with you and never enter the sports centre. Aya returns the complete production record instead of protecting herself by staying away.

The film is not replaced by a flattering fiction. What remains is labelled "contemporary borrowed-scene production," including both Aya's earlier editing and her decision to stop misleading others. This is a fictional production-team decision, not a real judicial finding.

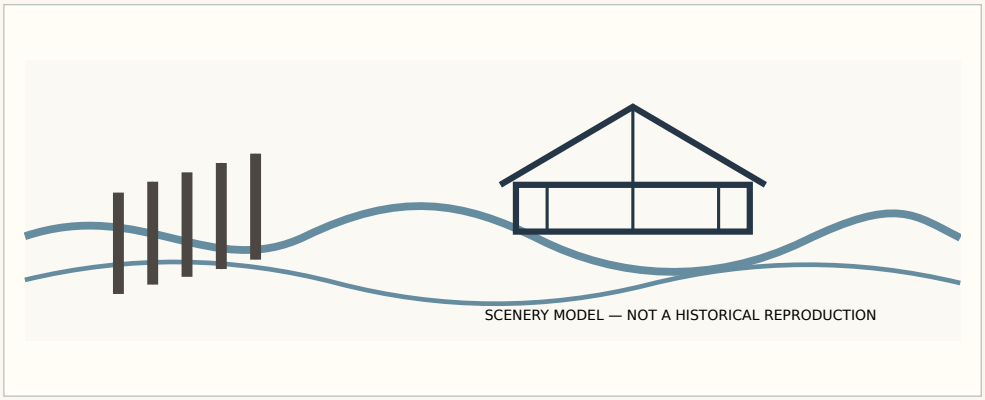

> **Aya** I thought I had to make myself look good before I could tell the whole story.
>
> **Your team** You put the frame back. We saw that part.

Keep the complete scene. You may now fill the game receipt with observations, sources and any assistance used. It will not be mailed to a real venue.

Act 6 · This time, you decide what stays

FINALE · Read in order

A day with nothing omitted for someone else

Original storyboard · not a live feed, source recording or site photograph

Aya places the souvenir beside the frame without covering the river. At the start, a gap looked like something lost. Now you know the foreground belongs in the view and old names have their own place. You leave as the people who kept this Tokyo experience intact, rather than extras enlisted to vouch for someone else.

Open the receipt if you wish; cut and fold the souvenir now. Write the discovery you want to remember, or simply today's date.

Independent signature: our observations only

You sign your observations. Aya signs her separate production account and clips the two together. "Thank you for helping without taking responsibility for what I did." The complete scene stays with the full record. Nothing is withheld for choosing an independent signature.

Joint signature: Aya and we each own our part

You state your separate parts on the same page. Aya signs under "production and editing," leaving your signatures unobscured. "Being together does not mean hiding behind each other." The complete scene stays with the full record. Joining does not erase responsibility.

The ending is complete. Cut and fold the souvenir on the last page. You may leave the assembled scene on your clipboard. There is no hidden puzzle, extra stamp or venue collection task.

The closing response

Use after the complete ending; no advance preparation required

The paper ending is complete: Act 1 rejoins the original strips; Act 2 lifts and replaces the frame, removes the hands and changes the caption; Act 3 keeps the two river names, time tracks and camera marker distinct; Act 4 joins the four theatre names while separating relocation; Act 5 states the withdrawal of the misleading edit and cancellation of the reshoot; Act 6 records your signature and makes the souvenir. These use the original puzzle materials, with direct replay instructions in the ending. Early and assisted solutions receive all six acts.
